- Spearheaded end-to-end Shopify, Bigcommerce and React projects, improving customer engagement and business revenue.
- Implementation of custom apps, snippets, sections and blocks.

### Projects of React | Next.js:

#### 1. CRM Bays | <https://www.crmbays.com/>

In this project, my role was to create the website for a company and add the content of the services they provides and integrate the other platforms like salesforce, jotForm Etc.

#### 2. Bigcommerce S3:

In this project I created a Bicomemrce app for [Mr. Video Productions](#) which helps to assign the files for Amazone S3 buckets with the Bigcommerce products and send the downloadable links to the customer who purchase them and also they can regenerate the links from their website after the links getting expired

#### 3. Review App:

I created an app in shopify for [Alkalinesuperfoods](#) so their customers can add the review on there products and the admin can show that reviews in products accordingly.

#### 4. Order Subscription App:

This app I created for [Alkalinesuperfoods](#) so their products can have the a subscription type of order with auto payment from stripe.

#### 5. Nep Tune | <https://nep-tune.web.app/>

Nep tune is a web app which provides the playlist of radio channels my role was to design and develop pages and the playlists of channels as well as the config the tracking system.

#### 6. Lennobyte | <https://lennobyte.com/>

Lennobyte is a company who provides the web development and management supports and for them I created their web app with their contents of their services integrated the Jot form.

### Projects of Shopify:

#### 1. Polachecks | <https://polachecks.com/>

They used to sell luxury watches like Rolex and other types of jewelry. My role was to create easy navigation and custom sections and pages for specific products, as well as implement custom filtration and add third-party tracking tools.

#### 2. Manfredijewels | <https://www.manfredijewels.com/>

They used to sell the same products as Polachecks, and my role was similar. I created easy navigation and custom sections and pages for specific products, as well as implemented custom filtration and added third-party tracking tools.

#### 3. That Gorilla Brand | <https://www.thatgorillabrand.com/>

They used to sell clothing items. My role in this project was to create a custom loading screen for the homepage, implement custom filtrations, and develop a custom app through which customers would receive discounts when purchasing via Stripe. Additionally, I created a subscription functionality that allows for automatic ordering of selected products.

#### 4. Alkalinesuperfoods | <https://alkalinesuperfoods.com.au/>

They use to sell the the suppliments which improves the biochemical processes within the body to support better performance in various aspects of life. And my role was to customize the store and design the store.

#### 5. Giorgiomilano | <https://www.giorgiomilano.com/>

Giorgio Milano specializes in luxury watches and bracelets. I customized their Shopify theme for better navigation, added custom functionalities, and implemented a color variant selection on product listings.

#### 6. Hamra Jewelers | <https://hamra.com/>

Hamra jewelers also sells luxury watches like Rolex and other types of jewelry. My role was to create easy navigation and custom sections and pages for specific products, as well as implement custom filtration and add third-party tracking tools.

### Projects of BigCommerce:

#### 1. The Gel Bottle | <https://thegelbottle.com/>

In this project, my role involved migrating the shop from Prestashop to BigCommerce. I managed custom widgets that allowed the client to update content independently as needed. Additionally, I handled third-party integrations, displayed product sets on blog pages, and implemented conditional "Add to Cart" buttons based on customer groups, along with custom messages on products.

#### 2. GP-Direct / GP-Implant | <https://gp-direct.com/>

GP Direct is a website that sells dental implant products. In this project, my role was to implement a bulk add-to-cart feature, allowing customers to add multiple variants with a single click. I also managed third-party integrations and developed custom page templates for different products, along with custom widgets.

#### 3. BC Software | <https://bcsoftwear.com/>

BC Software is a brand that sells luxury products such as towels, bathrobes, slippers, and more, with the option to add custom embroidery to their products. They sell through both B2C and B2B channels. My role was to develop the embroidery customization feature for their products on the product detail page (PDP) and cart page, as well as implement a gift-wrapping customization option on the cart page.

#### 4. Vaperanger | <https://vaperanger.com/>

Vaperanger is a store who sells the vape and smoking products and my role in that project was to customizing the pages, integrating the apps and designing the store.

#### 5. Mr. Video Productions | <https://mrvideoonline.com/>

MrVideoOnline is a store that sells videos of events and shows. I developed an app from scratch and integrated their BigCommerce store with their Amazon S3 bucket, where they store their videos. Before the integration, they faced numerous challenges. They primarily sold event- or show-related products, which were mostly physical. These products had multiple variations: some were for physical delivery only (DVD), some were digital (HD downloads) sent via email, and others offered both physical (DVD) and digital (HD download) delivery.

6. **Razny** | <https://www.razny.com/>

Razny is a luxury jewelry store specializing in Rolex watches. I designed their BigCommerce store to meet Rolex's brand requirements and integrated third-party tracking solutions.

7. **Finearthl** | <https://finearthl.com/>

Fine Art Handcrafted Lighting specializes in luxury decorative lighting for homes and hotels, catering to both B2C and B2B customers. My role involved designing an attractive, user-friendly store and integrating features like one-click shipping and tracking apps.

8. **MagneticSciences** | <https://magneticssciences.com/>

MagneticScience sells the test instruments, probes and sensors for measuring electromagnetic fields for over 20 years and I migrated their store design from Blueprint theme to the Stencil theme with all the functionalities and features.

---
